

# Understanding risk and opportunity in the growing cannabis sector

The cannabis industry is evolving fast as countries and states legalise it for different uses. Our partnership with CRB Monitor provides access to vital intelligence for business development and due diligence in this dynamic market.

Classification: Public

## Understanding risk and opportunity in the growing cannabis sector

With uses ranging from medicine to nutrition and recreation, cannabis products are a complex market. And because their legal status varies widely between markets, it can be hard to know whether or not business counterparties present a risk. In the US, for example, recreational cannabis is legal in some states, yet illegal at the federal level.

### Get informed

Regulation is also evolving and often ambiguous. So whether you're looking to develop business with the cannabis market or working with organisations that are exposed to it, it's vital to be well informed.

### Category-leading data.

Through our new partnership with category-leading vendor CRB Monitor, you can search a comprehensive cannabis industry database according to your own risk tolerances. Coverage includes:

#### Coverage:

- 20,000+ cannabis-related businesses
- 33,000+ ultimate beneficial owners
- 45,000+ licences

### Data available

- Verified company name and address
- Cannabis licences at US state level
- Company structures and UBOs
- Company span of control that includes Canada
- Director information

### Evolving dataset

This is just the beginning. The CRB dataset will be enhanced over the coming months, adding PEP, sanction and reputation risk exposure.
